Kidist, LLC

Performance Engineering · Software Testing · IV&V for Federal Programs

CAPABILITY STATEMENT
Silver Spring, Maryland

ACTIVE FEDERAL PERFORMANCE: U.S. Department of Education · U.S. Coast Guard C5ISC (DHS)

COMPANY OVERVIEW

Kidist, LLC is a senior-led small business that helps federal primes and agencies deliver systems that hold up in production. We specialize in performance engineering, load testing, and independent verification and validation (IV&V) for modernization and cloud migration programs, so that a system that passes functional testing doesn't fail under real-world load at go-live.

CORE CAPABILITIES

- **Performance engineering:** workload modeling from production analytics; load, stress, endurance, and spike testing with NeoLoad and LoadRunner; bottleneck root-cause analysis across application, database, and infrastructure tiers; capacity planning.
- **Production readiness:** go/no-go performance criteria, SLA validation, and peak-event readiness for high-demand, public-facing systems.
- **Cloud migration validation:** before-and-after performance baselining for AWS GovCloud migrations.
- **Software QA & IV&V:** test strategy, test automation, and independent verification of deliverables.
- **Accessibility & compliance testing:** Section 508 testing; NIST 800-53 / FISMA compliance testing support.

FEDERAL PAST PERFORMANCE

U.S. Department of Education — Performance testing and IT modernization support
Subcontractor to Technik Inc · Active (recently extended)

U.S. Coast Guard C5ISC (DHS) — IT and cybersecurity support
Subcontractor · Active

U.S. Department of Energy, EERE — EPIC modernization projects: performance testing and IV&V
Subcontractor to IvoryCloud · 2022–2024

VALUE TO PRIME PARTNERS

- **Proposal support:** performance test strategy, non-functional requirements traceability, and technical volume input.
- **Delivery risk reduction:** performance testing built into agile and DevSecOps pipelines, so defects are caught in the sprint rather than at go-live.
- **Small business participation:** a niche, low-overhead partner that supports subcontracting plan goals and does not compete for prime work.
